

VoiceNav

See It. Touch It. Hear It.

“ Keeping my family safe and connected ”

The Hills Reliance VoiceNav perfectly complements your home décor

*Optional Chrome Trim Available

The security code pad that appeals to your senses

Your family is safe and protected with the Hills Reliance VoiceNav - an architecturally designed security code pad with innovative features that make it easy to use.

See It -

the sleek design illuminates
to suit any décor

Touch It -

the responsive interface
reflects your every touch

Hear It -

the voice guide navigates
you through its functionality

This unique combination of user friendly features and contemporary design makes the Hills Reliance VoiceNav an essential part of your home.

Speak to your installer to arrange a security consultation.

Advanced Touch Interface:

Touch response keys, colour-changing Status key and individually lit SmartKeys work for you, making it one of the most intuitive security systems to use.

VoiceCheck Status Key:

Makes it so easy to check your security system without a manual.

Modern Architectural Design:

The slimline code pad (<16mm) complements your home's décor with contemporary appeal.

Intercom Functionality:

Talk to family and friends in up to 8 locations around your home, with Monitor Mode, Privacy Mode and Auto-Answer features.

Interactive Personal Voice Guide:

Imagine someone walking you through every step of using your security system and intercom.

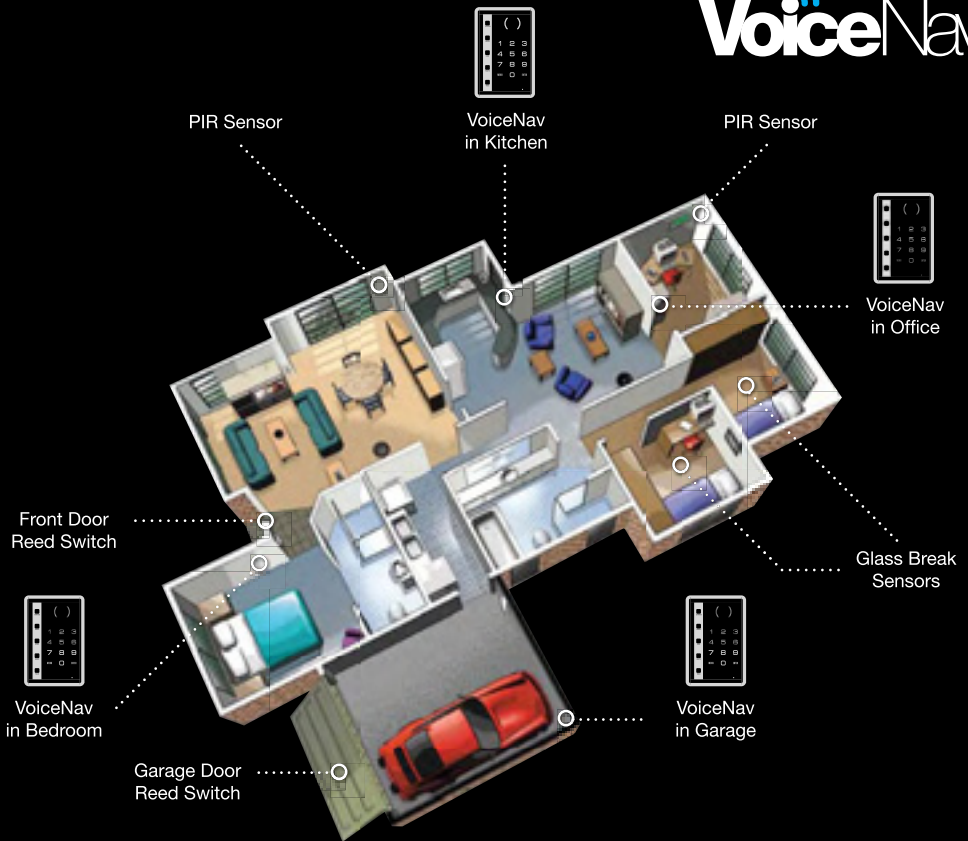

Simple Menus:

Easy to use menus allow you to see, hear and use all the advanced security features.

Customizable Voice Recording:

Record your own names for different parts of your security system. Now it's easy to make sense of all the security locations around your home. You can even leave voice messages for family and friends that play back when they leave or return home.

Installing Hills Reliance VoiceNavs around your home keeps your family connected with the intercom feature. For example, one upstairs and one downstairs.
